

Damage Insights Assistant:

Purpose: Assist Quality Engineers and Warehouse Managers in identifying the root causes of damage and implementing corrective actions, thereby reducing the overall damage rate.

Product lines supported today : Dishwasher, Refrigeration

Source systems for Image processing: Cnet (Returns) & Finalmile (Refusals)

Frequency of processing : Returns - daily & Refusals - weekly

This tool supports:

1. **AI Conversation:** Open chat conversation with the Agent
2. **Gallery:** Analysis of the Damaged Images with required filters

Data is not inclusive of all damage returns for the product line and manufacturing site. It is currently limited to returns from BG&I, NECO, and Contract customers and to entries that include legible damage photos.
